

Integrated Research Compliance Platforms

Simplifying Oversight Without Slowing Innovation

Your Compliance System Should Not Be Your Biggest Bottleneck

Due to the complexity of compliance regulations, research institutions are generating an unprecedented volume of data. Research compliance teams continue to use outdated practices like spreadsheets, email, and siloed portals for IRB, IBC, IACUC and COI checks.

The Consequences? Frustrated Principal Investigators, deadlines that are missed, audits become more difficult, and the overall research process stagnates.

Managing compliance this way does not hold up over time.

One Platform. Automated Control. Zero Compromise.

Integrated research compliance platforms unify each and every protocol, review, approval and document in one system.

A lost email, a missed deadline, a version control issue, and a lack of visibility into the compliance process are eliminated.

These platforms provide a scalable compliance solution that truly enables research. They standardize workflows for governance automation, resulting in higher value research. Automated systems are proven to improve accuracy, efficiency, and consistency by standardizing policies.

Complete Institutional Oversight:

- ✓ Cover all your bases with complete oversight functions
- ✓ Real-time dashboards show exactly where every protocol stands
- ✓ Automated workflows catch issues before they become violations
- ✓ Audit trails are instant, complete, and defensible
- ✓ Visibility of all levels of risks across all committees and programs

Seamless Research Operations:

- ✓ Submit once and track everything in one place
- ✓ Automated routing gets you faster approvals
- ✓ Spend less time on paperwork and more time on discovery
- ✓ You'll never have to wonder about your submission's status again

Your compliance team gains organizational control without bureaucratic hindrances. Your researchers skip administrative delays. Everyone works more optimally and complies with all regulations.

Built To Grow with Your Research Organization

Automated compliance systems adapt to the ever-increasing volume of data and regulatory changes without increasing complexity or cost. With better data, less operational strain, and sustained oversight, you are empowered to manage risk in line with the growth of your research portfolio.

The best institutions are already reaping the benefits of faster protocol processing, compliance delay elimination, cost-saving, and audit-ready documentation, all while empowering their research teams.

Leave behind patchwork systems and event-driven oversight

Experience it firsthand. Request a demo today and discover how integrated automation delivers control without compromise.
